THE NEWPORT BEACH

SUNRISE ROTARY CLUB

# Passport to Health

Dear Friends,

Welcome to the 2014 Passport to Health Fundraiser sponsored by the Newport Beach Sunrise Rotary Club.

Rotary is the oldest and largest service club in the United States. It began in the US in February of 1905 and has spread worldwide. Rotary has clubs in almost every major city in the world, and very likely has a club or two in your hometown.

On an international level Rotary has a major goal to end polio throughout the world. Rotary members from clubs on every continent have joined to administer vaccines to children of every race, creed and color in order to prevent polio, just as Small Pox has been eradicated from the planet. It is almost gone; just a few hundred cases in the world now. We are "This Close!"

On a local basis, Newport Beach Sunrise Rotary supports many worthwhile organizations in our own neighborhoods. To name just a few: Working Wardrobes, Salvation Army, Wounded Warriors Families, scholarship funding for Back Bay/Monte Vista Continuation High School graduates, along with vision, hearing, dental and healthcare for underserved people in our communities.

This year's fundraiser theme is Passport to Health. Our lead beneficiary is the Bacchus-Doc in a Box program which provides mobile medical, dental, vision and healthcare to underserved children and senior citizens who would not otherwise have care available. The 2014 goal is to deliver \$1,500,000 worth of free healthcare to people in our communities. We can't do it without your help.

Thank you in advance for your tax deductible financial support!

Jeff Heilesen  
President  
Newport Beach Sunrise Rotary

## Bacchus- Doc in a Box

# DOC in a BOX

[www.bacchus-docinabox.org](http://www.bacchus-docinabox.org)

We are constantly asked “Why Bacchus-Doc in a Box?”

Each year the International Bacchus Society takes on a new or interesting challenge. In 2007 we received a letter from The Africa Project asking for our support. Our founder Steve Bender began researching the area, organization, and needs. While he was very impressed with The Africa Project’s reputation, he was horrified to learn that each year in Africa the number of men, women, and children that die from AIDS is equivalent to the population of Orange County.

The Nkandla region of South Africa has the highest rate of HIV and AIDS in the world. Bender contacted The Africa Project and said, “We need to improve conditions, not just send a check, but send a solution.” Bender turned to Western High School’s Building Industry Technology Academy (BITA) program to realize his vision. The students, as a part of the industrial arts program, would build the clinic and learn about philanthropy and the needs of children in South Africa.

The result: A Bacchus Society partnership with BITA and the Africa Project to build a medical clinic out of a 20 foot shipping container.

*Bacchus Doc-in-a-Box Founder,  
Steve Bender inside the first Box  
built for Nkandla, South Africa*

Under the guidance of Jerry Cates at Western High School, the students will learn about construction techniques for solar, wind, water collection, and insulation; providing them with valuable skills for the emerging green job market.

The “Bacchus-Doc in a Box” interior will include an examination area, medical supplies, refrigeration, water filtration, and record storage. Outside the box is a multimedia education center to perform topical seminars on sex education, health issues, basic sanitation, and safety. A convenient community bulletin board will have current health information to help villagers stay informed. “Our students have decided to make this a school-wide project, running an awareness campaign and supplies drive,” said Cates. “We are learning about another culture, HIV/AIDS and donating our building skills to a worthy cause. It’s a big deal.”

“We need to improve conditions, not just send a check, but **send a solution.**”

The Nkandla region of South Africa has the highest rate of HIV and AIDS in the world. Particularly hard hit are the young parents who are dying off leaving orphan children as head of households.

Building Industry Technology Academy (BITA) students from Western High School in Anaheim designed and built the first Bacchus-Doc in a Box out of a used 20 foot shipping container.

We will complete the Box and open the Holistic Health Center in Nkandla South Africa in 2014 and begin offering these services with our strategic partners "The Africa Project":

- Health Screening
- HIV Counseling and Testing
- TB Testing and Treatment
- General Health Counseling and Education
- Dental
- Vision Screening
- High Teen Pregnancy Rate: Girls who are pregnant must report to a teacher, and then receive classes on pre-natal care. Also, Preventing Mother to Child Transmission of HIV (PMTCT) is a critical issue in the community.

Jerry Cates and his BITA class receive awards from local dignitaries

“Working together to **make a difference** in the lives of children in Africa devastated by poverty and AIDS.”

# Bacchus-Doc in a Box The Dental Box

**Ayuda International**  
SINCE 1967

"Improving Dentists Improving the World"

The Strategic Partner on our first dental box is AYUDA International. We met with AYUDA International's Co-Founder and Rotarian Dr. Harris Done. Dr. Done has spent the last 47 years travelling throughout California and the world offering free dental services to the underserved. Dr. Done has been the recipient of many Rotary and other awards, and is a true example of "Service Above Self". His expertise was invaluable in designing the Dental Box and his passion was contagious. We approached Western High School again and completed the Dental box in 2013. In 2014, our first Dental Box will provide over \$1 million worth of free dental services to the underserved. We are already designing our second dental box, which will be used by other dental schools and organizations in California, Washington, Oregon and Mexico.

In 2011 we discovered that **23%** of Elementary School Children in California have never visited a dentist and that over **50%** of Hispanic and African American children in California suffer from tooth decay!

Interior of the Dental Box

Your name will be engraved on a plaque displayed on any dental unit or sterilizer you donate.

*Dr Done pictured in USC Poncho and his USC Dental School volunteers at an elementary School in Rosarito, Mexico October 2013*

AYUDA is made up of volunteer students and instructors from USC Dental School. AYUDA is a 501-c 3 non-profit organization whose purpose is to provide free dental care to underserved individuals. The object of AYUDA is to be actively engaged in and dedicated to improving and sustaining the oral health and social betterment of all underserved areas, providing assistance through treatment and training both within the United States and abroad.

AYUDA's mission is centered upon the 5 following concepts:

- 1) High ethical and professional standards.
- 2) Respect and appreciation for all people.
- 3) Highest quality care.
- 4) Commitment to compassionate service.
- 5) Exchange of knowledge.

*Steve Bender, Founder-CEO Bacchus-Doc in a Box holds a happy patient in Guatemala while Yorba Linda Rotarian Modesto Llanos helps children in line for dental treatment*

In 2014 the Dental Box will provide **over \$1 million** of free dental services to the following organizations:

- Jan 25** Corona Community Health Day Clinic
- Feb 8** Magnolia School District Clinic, Jonas Salk School
- Mar 1** Fullerton School District
- Mar 12-15** Terra Bella
- Apr 18-28** Peru International Clinic
- May 3** La Crescenta Stake
- May** Orangewood Children's Home and Academy
- Jun 7** Fullerton Senior Clinic
- Jul 12** Tustin Senior Rotary Clinic
- Aug** Rosarito, Mexico Clinic
- Sept 6** A Place called Home In Los Angeles
- Oct** Rosarito, Mexico Clinic
- Nov** Laguna Niguel School Rotary Clinic
- Dec** Rosarito, Mexico Clinic

*All dates subject to change*

# Bacchus-Doc in a Box The Vision Box

Our Strategic partners are Rotary International, Kids Vision for Life, The Essilor Foundation, The Alcon Foundation and Southern California College of Optometry.

We are building our first Vision Box at Western High School, and it will be operational in early 2014.

We will be requesting Optometrists to sign up for our volunteer database at [www.Bacchus-DocinaBox.org](http://www.Bacchus-DocinaBox.org)

We currently have **4 clinics** set up for 2014 and will be adding many more in the near future:

**February** Sunburst Youth Academy

**March** Orangewood Foundation Academy

**April** KVFL/Alcon/Jennie Garth Vision Fest in Santa Ana

**July** Sunburst Youth Academy

*All dates subject to change*

## EYE OPENING FACTS

**80%** of learning in a child's first 12 years comes through their eyes. (1)

**25%** of all school children in the US have a vision problem significant enough to affect learning. **20%** need glasses. (2)

**90%** of children who need glasses do not have them. (3)

**78%** of juvenile offenders have a vision problem, **56%** have two or more vision problems, **43%** need glasses. (4)

## Bacchus-Doc in a Box A Look to the Future

We will be working with Rotary clubs throughout the United States to replicate our programs.

We are currently designing a Pre-Natal Services and a Dental Hygiene Box to be used in Southern California and Mexico. Our Second High School (Anaheim High School Building

Industry Technology Academy) will start building the first Dental Hygiene box in 2014. This will be used at elementary schools in Orange County. The most efficient use of resources is prevention and education in second grade, so we will be offering free cleanings, fluoride treatments and education to elementary schools in 2014.

## Bacchus-Doc in a Box Solar Charged Electric Assisted Ambulance

According to the United Nations, “a woman in South Sudan has a one-in-six chance of dying during pregnancy during the course of her lifetime” and “A 15-year-old girl is more likely to die in childbirth than to complete school”.

Our low cost ambulance can travel at speeds in excess of 20 mph to transport villagers to the hospital or deliver medical supplies and treatments.

We will do a 12-month analysis comparing 10 Solar Charged Electric Assisted Ambulances (SCEAAs) to a traditional ambulance. Studies have shown that ambulances break down in a short period of time due to lack of education, maintenance, spare parts, and petrol.

Our 10 SCEAAs will cost less than one traditional ambulance and be shipped with spare tires and medical supplies. Our Solar Charged Electric Assisted Ambulance is virtually maintenance free and creates its own power.

## Bacchus-Doc in a Box Literacy Box

We are designing a Literacy Box that will be a mobile Library / Community Center out of a 40 foot shipping container. Our strategic partners are the Irvine, Yorba Linda, and Newport Beach Sunrise Rotary Clubs in collaboration with the “Rotary Books for the World” program.

# The Salvation Army and Working Wardrobes

[www.salvationarmyusa.org](http://www.salvationarmyusa.org)

[www.workingwardrobes.org](http://www.workingwardrobes.org) • [www.thehangerboutiques.org](http://www.thehangerboutiques.org)

Working Wardrobes empowers men, women, veterans and young adults overcoming difficult challenges to confidently enter the workforce and achieve self-sufficiency. We provide career assessments, skills training, career development services, job placement assistance and professional wardrobes in an environment of dignity and respect.

Now in its 23rd year, the independent nonprofit organization has served more than 65,000 clients emerging from life crises by providing:

- Career readiness and life skills workshops on resume writing, interviewing, job searching, financial literacy and much more
- Certification in customer service and retail sales through the National Retail Federation
- Specialized services for veterans through VetNet, a safety net for veterans including outreach, enrollment, placement and follow up.

The Salvation Army, an international movement, is an evangelical part of the universal Christian Church. Its message is based on the Bible. Its ministry is motivated by the love of God. Its mission is to preach the gospel of Jesus Christ and to meet human needs in His name without discrimination.

With your support,  
our clients can say  
**“I got the Job!!”**

### Families of Wounded Warriors

---

[www.insertwebsitehere.com](http://www.insertwebsitehere.com)

Last year our Rotary highlighted our work in support of the families of “wounded warriors” from the Marine Corps base at Camp Pendleton.

Laura Dietz is the military liaison to the nearby base and outreach chair, who identified the need of the spouses. She discovered that spouses are not qualified for certain educational grants when their injured husbands reach a certain pay grade and he wife has to become essentially the main breadwinner.

About 60% of active duty Marines are married and most have started their families, increasing the pressures on the wounded warrior to support his family. By providing grants to the spouse and childcare support, the wife can attend school and obtain some type of degree for a career. At this time there are eleven wives in our program receiving assistance, a number which is going to grow.

To date we have provided about **\$12,000** in grants and will continue to support these outstanding young women whose lives were changed forever by the war but who show **incredible courage to persevere** with their beloved Marine.

*Wounded warrior family celebrates their baby's first Christmas*

*Rotarian Laura Dietz decorates the donated piano to ensure Christmas is evident, especially for the children*

### Drug Court

---

[www.insertwebsitehere.com](http://www.insertwebsitehere.com)

The Newport Beach Sunrise Rotary Club has been involved with Harbor Drug Court for over fifteen years. Our Club feels this is a very important Community Service project.

Harbor Drug Court gives people that have been arrested for illegal drug possession the opportunity to stay out of jail and get their criminal records cleaned up by participating in an extremely rigorous 18 month program. Our club members get to sit in the jury box and witness Harbor Drug Court graduates reunite with their families and loved ones. Upon graduation our club awards the participants of Harbor Drug Court \$100.00 gift certificates.

### Mount Olive Academy

---

[www.insertwebsitehere.com](http://www.insertwebsitehere.com)

Ken Idwasi,  
President  
Hurlingham  
Rotary and  
Fr. Henry

Computer Lab

Fr. Henry Simaro is a priest from Athi River, Kenya, who saves very young girls from early marriage or prostitution by educating and feeding them. His schools are located near truck stops off the Mombasa Highway about 20 minutes south of Nairobi. Fr. Henry built three schools in Athi River of which Mount Olive Academy is the newest boarding school built through the generosity of Orange County supporters. Newport Beach Sunrise Rotary purchased bunk beds for the new school in 2009. In 2010 Newport Beach Sunrise Rotary, Fullerton Rotary Club and Hurlingham Rotary in Nairobi applied for a Rotary Matching Grant to purchase 18 computers for the Mount Olive Academy. The Hurlingham Club along with some of Fr. Henry's Orange County supporters delivered and installed the computers in 2011.

## SPONSORS

### Newport Mesa Schools Foundation

---

*www.insertwebsitehere.com*

The Newport Mesa Schools Foundation Grants Program is a volunteer, non-profit organization of community members who support excellence in education by raising funds for the Grants to Teachers Program and curriculum needs. The Foundation was formed in 1981. Grants are given based on written requests, read by volunteers who do not know which teacher nor from what school came the request. Grants are given out in February at the annual dinner.

Each year the Newport Beach Sunrise Rotary Foundation provides college scholarships to four or five worthy students at Back Bay and Monte Vista High Schools in the Newport-Mesa Unified School District. The students that receive these scholarships are in financial need, have overcome significant hardships in their lives, and have the potential to become more productive members of the community.

## SPONSORS

### OC Exploring Boy Scouts of America

[www.ocexploring.org](http://www.ocexploring.org)

Originated by the Orange County Council, BSA over 50 years ago, Exploring is a worksite based program where high school students enter into Scouting supported internships to obtain hands-on experience in professions of their choice, gaining knowledge, self confidence and a sense of integrity in the process.

In many instances a participating student will receive an offer of full time employment by a private firm or public agency in which he or she has served as an Explorer. Exploring is open to all youth, boys and girls ages 14 through 20. Any type of business or public agency can host an Explorer post.

Newport Beach Sunrise Rotary Club has supported Exploring over the years with significant annual contributions to the support of its many programs.

### Newport Sea Base

[www.newportseabase.org](http://www.newportseabase.org)

3,000 boys and girls annually flock to the shore every summer to participate in the aquatic proficiency and marine science programs offered by the Newport Sea Base.

Renowned for the popularity of its summer programs, the Sea Base is turning its attention to providing use of its facilities during winter months by extending to local and inland schools the benefits of hands-on, curriculum-based programs for 1st through 3rd grade students to observe first hand the marine mammals, the birdlife, and the effects of environmental pollution that they read about in their classrooms.

Still in its infancy, growth of the program is hampered by inability of underfunded inland schools to pay the modest busing and program costs involved. Newport Beach Sunrise Rotary Club has stepped in to fund much of those costs, with anticipation of expanding the program as its popularity spreads.

## SPONSORS

### International Printing Museum

[www.printmuseum.org](http://www.printmuseum.org)

The International Printing Museum features one of the world's largest working collections of antique printing machinery. History comes to life for students of all ages through the Museum's innovative educational programs, highlighting American and world history, great inventions and inventors, science, the Constitution, literacy and the creative arts. For many years, the Newport Beach Sunrise Rotary Club has funded the Printing Museum's mobile program, Franklin's Colonial Assembly, to various schools in the Newport-Mesa School District.

The Museum on Wheels exhibit features Franklin's working colonial printing shop and many original and historical props and artifacts; through printing demonstrations and interaction, students learn about how books and printing shaped young Franklin's life and he in turn grew up and shaped our world. The students also meet Dr. Franklin in their school auditorium as he details his world of electricity, science and invention.

### The Raymond M. Alf Museum of Paleontology

[www.alfmuseum.org](http://www.alfmuseum.org)

The Raymond M. Alf Museum of Paleontology is the only nationally accredited museum located on a secondary school campus—The Webb Schools. The museum holds over 140,000 specimens, with exhibits divided into the "Hall of Life," which traces the history of earth from the first cells through human civilization, and the "Hall of Footprints," which holds the most diverse display of fossilized animal tracks in the United States.

In October of 2013, the Alf Museum made international news with its announcement that one of the Webb high school students found the youngest, smallest and most complete fossil skeleton yet known from the iconic tube-crested dinosaur *Parasaurolophus*. The discovery shows that the prehistoric plant-eater sprouted its strange headgear before it celebrated its first birthday. Three-dimensional scans of nearly the entire fossil are freely available online, making this the most digitally-accessible dinosaur to date. See it online at [www.dinosaurjoe.org](http://www.dinosaurjoe.org).

The Newport Beach Sunrise Rotary Club has made a number of grants to the Alf Museum to fund a special program to give extra paleontology training to all of the science teachers in the Newport-Mesa Unified School District.
